nais system - noa strategic plan

there should never be hot branding of any animals to cause it pain and abuse. of course aphis thinks nothing of pain and abuse and killing since it has invented a holocaust gas chamber to gas geese to death - a really horrendous thing for a govt agency to be doing.

Diseases are caused by agribusiness which treats all animals they are in charge of abusively and disgustingly depraved, all for money and profit and greed.

pigs are not allowed to move or turn around and kept in tight cages for their entire lives until they go crazy and bite the bars around them.

chickens are kept 5 to a cage that is as big as an 8-/12 by 11 inch piece of paper. They live in ammonia filled places where feces can drip on them. their beaks are torn off with no pain killers, sometimes taking off parts of their faces. all water and food is taken away from them for up to 14 days to molt them artificially. they get not a shred of a decent live and then agribusiness hires brutes who bang the chickens heads against the wall to kill them. NO WONDER THE CHICKENS ARE SICK.

IT IS TIME TO MAKE AND FORCE AGRIBUSINESS TO LET CHICKENS AND PIGS AND COWS LIVE NORMAL LIVES INSTEAD OF THE HORRIBLY ABUSIVE LIVES THEY LEAD UNDER THE U.S.D. AND ITS PROFIT MAD CROWD OF BUREAUCRATS IN WASHINGTON.

this crowd lets chickens and other animals be fed chicken feces. it is a terribly disgusting business which makes animals sick. We need to stop this. animals will be well enough if they get decent treatment. usda HAS NOT ALLOWED THIS AT ALL.

comment on page 4 - why on earth are producers "concerned about the "confidentiality" of the information collected? Is it so we can trace the records of how they treat these poor animals?

There is no burden with these requirements. these requirements should have been imposed years ago, but for USDA only pursuing profiteers for agribusiness and forgetting about the animals or the consumers.
Burden my eye!

Both buyers and sellers should be reporting any movement at all of any animals anywhere. Letting a report come from one party is completely inadequate.

There is computerization which can eliminate a lot of shuffling of papers if it is properly set up. All agribusiness should be charged for this service of registration.

comment on page 5 - to register - charge agribusiness sites \$50,000 for a first placement on the computer system. The first move of the animal costs \$5,000. Charges continue for any movement of that animals.

It is time we stop letting agribusiness put us all over the barrel with us having to do whatever they force upon us. It is time to make agribusiness toe the line.
